

MACHINERY & RESOURCES

Our personnel is the key of our success!!

The degree of specialization achieved by the operational and technical personnel guarantees quality and efficiency, enabling CLF group to place itself at the highest levels in all areas in which it operates.

CLF uses highly specialized machinery to work on fully automated sites, ensuring quality standards, high productivity, reducing construction time and associated risks. The **Operation Centre**, Certified by RFI as maintenance workshop of the machinery is located in Reggio Emilia.

COSTRUZIONI LINEE FERROVIARIE SpA

The future runs on safe tracks

www.clfspa.it

WHO WE ARE

CLF Costruzioni Linee Ferroviarie SpA is a leading company in the field of design, construction, maintenance and renewal of railway, underground and tramway lines.

The long history, the qualified experience and financial soundness,

the high level of knowledge and the integrated management of CLF, of the subsidiary companies and of the sole shareholder **Strukton Rail**, provide the Customer with a "full service" approach in the renewal, maintenance and construction of railways, underground and tramway lines both in Italy and abroad.

Our goal is to make your rail transport a safe and reliable solution.

THE GROUP

CLF is born from a long history of engagement "on the tracks". A history started in 1945 that continues with the **Dutch shareholder Strukton Rail** that, strongly oriented to development and innovation provides "full service" solutions in the railway infrastructures, rail machinery and mobility systems in general.

The CLF group is composed by the **group leader CLF SpA** and its subsidiary companies:

UNIFERR (Track works),

S.I.F.EL (Electric traction systems and signalling systems),

Tecno Engineering System (Engineering and Design).
